Executive Summary

Python Full Stack Developer with a strong foundation in building responsive and user-friendly web applications. I have Skilled in Python, Django, React.js, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, Node.js, PostgreSQL, and database management. Hands-on experience developing full-stack web applications through internships and personal projects. Passionate about learning new technologies, improving technical skills, and contributing to software development teams.

Technical Skills:

- **Programming Languages:** JavaScript, Python
- **Frontend Technologies:** React.js, HTML5, CSS3, Tailwind CSS
- **React Tools:** React Router, Context API, State Management
- **Backend Technologies:** Django, Node.js
- **Databases:** MongoDB, PostgreSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Netlify, Postman

Soft Skills:

- Problem Solving & Adaptability
- Communication & Teamwork
- Quick Learner & Time Management
- Multilingual Abilities – Tamil (Native), English (Professional Working), Malayalam (Basic)

Professional Experience:

Futura Lab, Kochi

Jan 2026 – Present

Role: Python Full Stack Intern

Project: Foodie Zone – React Frontend Food Delivery Web Application **April 2026**

Responsibilities:

- Assisting in frontend and backend web development tasks for live projects.
- Building and modifying responsive UI components using React.js.
- Working on API integration, testing, and debugging features.
- Worked with **Python, Django, Node.js, and PostgreSQL** to support backend development tasks.
- Collaborating with mentors and developers on assigned modules.
- Contributed to Foodie Zone, a React.js food delivery web application.

Impact:

- Improved practical full stack development knowledge through real-time tasks.
- Strengthened frontend development and debugging skills.
- Delivered assigned work within deadlines.

Project: Railway Reservation System – Django Full Stack WebApplication **July 2026**

Responsibilities:

- Developed a Railway Reservation System using Python and Django.
- Implemented secure user authentication with registration and login functionality.
- Built train search, ticket booking, seat reservation, and ticket cancellation features.
- Integrated PostgreSQL database using Django ORM for efficient data management.
- Designed responsive user interfaces using HTML5, CSS3, Bootstrap, and JavaScript.
- Tested and debugged the application to ensure smooth performance.

Impact:

- Gained hands-on experience in full-stack web development using Django.
- Improved backend development, database management, and debugging skills.
- Successfully completed a real-world railway reservation web application.

Education

Bachelor of Engineering in Computer Science

Nellai College of Engineering 2021 – 2025

CGPA – 7.3

Project: Stock Market Prediction and Tracker

Responsibilities:

- Contributed to development of stock market prediction academic project.
- Worked mainly on frontend UI design and dashboard pages using React.js.
- Displayed stock trends, charts, and prediction results in user-friendly format.
- Coordinated frontend integration with Python-based prediction model.
- Improved interface usability and data presentation.

Impact:

- Gained hands-on experience in frontend project development.
- Improved skills in dashboard design and data visualization.
- Strengthened teamwork and project delivery experience.

Awards & Accomplishments:

- The Complete Full Stack Web Development Bootcamp – Udemy Certified
- React.js for Ecommerce – Udemy Certification
- Python Django Full Stack Development: Build Modern Web App – Udemy Certification
- AI & Machine Learning Internship Completed – Neural Transformers AI, Chennai
